

COMET STAINLESS STEEL FLEXIBLE HOSE

Connection Size	1/2" (DN15) & 3/4" (DN20) BSP
Connection Type	Male & Female Coupling
Working Pressure	6 bar
Length / Roll	20 meter (65 feet)
Certification	EN 14800

The Stainless Steel Flexible Hose is used to provide a safe and efficient installation of gas piping.

The hose is made of high quality stainless steel (SUS304) material and is equipped with a stainless steel coupling fitting in BPST pipe thread for easy and direct connection to gas appliances. The hose is also wrapped with a PVC protective cover providing it a high temperature and corrosion resistance.

The Stainless Steel Flexible Hose production process and testing is in accordance to the EN 14800 standard to ensure that the hose is qualified and in perfect working condition.

How to Cut Your Stainless Steel Flexible Hose
