

LLFA[®] TAPE — RELIABLE SEALING PERFORMANCE IN ANY CONDITION

LLFA[®] Tape is a self-fusing repair tape that instantly seals live leaks of gas, air or steam without shutdowns. It creates a strong, waterproof, and pressure-resistant bond that endures extreme temperatures fix for gas piping systems.

1"x40milx36ft(Red)

LLFA[®] Features

- Leak sealing up to 150 PSI
- Straight forward application and minimal prep time
- Proven stable from -90°C to 260°C
- Maintains properties if exposed to CH₄, H₂S & O₂
- Tensile strength: >1,200 PSI

LLFA[®] TAPE is a self-fusing silicone based type designed to seal leaks in harsh weather conditions and is currently used as a permanent repair for natural gas leaks.

- Provides a high-tension, compressive wrap that forms an enduring mechanical seal
- Performs reliably under extreme environmental conditions
- Ideal for repairing punctured gas, air, and hydraulic pipes
